

## CUNY DATA 607 – Project 3.

### How to connect to Remote MySQL

How to run code to connect to remote MySQL database.

First, we need to create MySQL Workbench Connection.

This is how:

Connection Name: mydvtech.com

Hostname: mydvtech.com

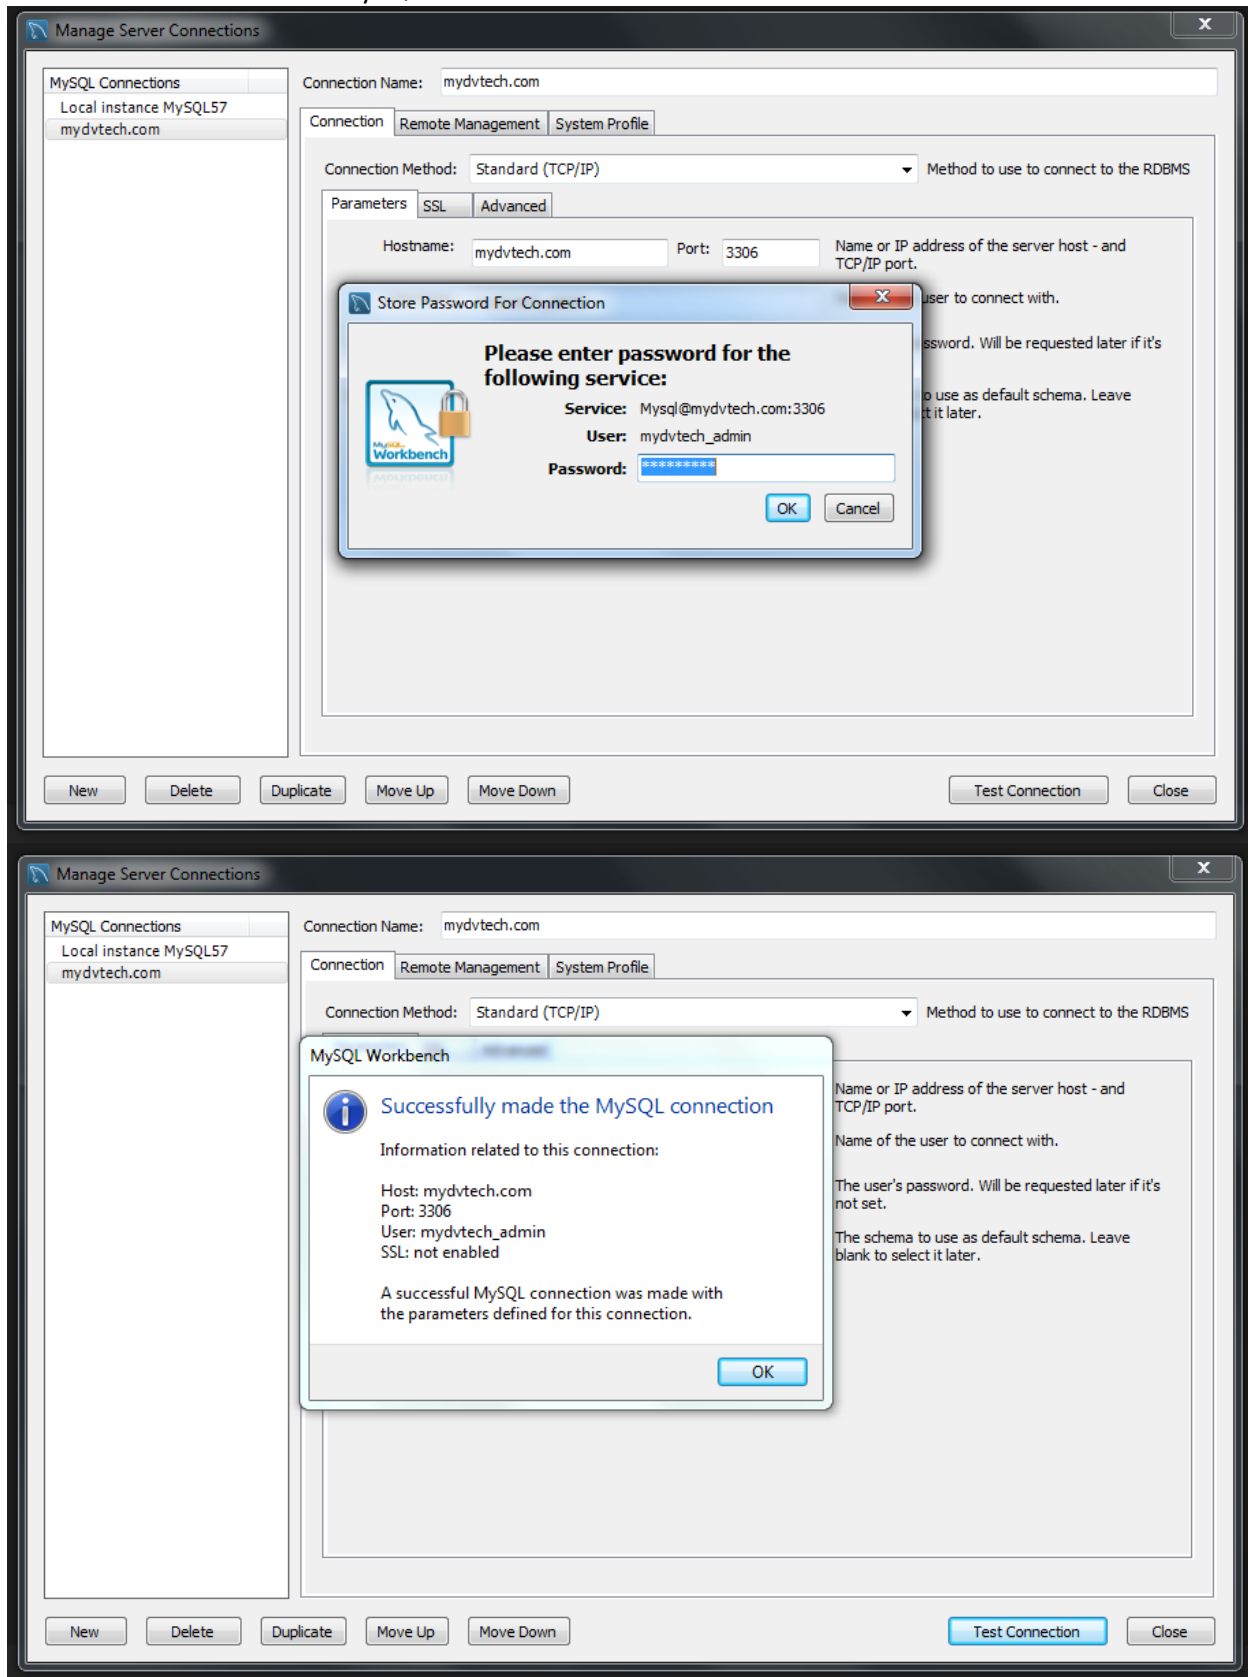

Port: 3306

Username: mydvtech\_admin

Password: password1

### CUNY DATA 607 – Project 3.

#### How to connect to Remote MySQL

In order to grant access I will need for each one of you to provide your IP address by running

<http://www.inmotionhosting.com/support/ipcheck.php>

Once everything is set, Run Duubar's MySQL R Code.
